Mary Skolos

Full-stack software engineer with 5+ years of experience building secure, scalable, and performant web applications.

Seattle, WA
(206) 399-2489
maryskolos@gmail.com

2022 - Present | Card Kingdom

Software Engineer II

- Improved search functionality and performance by optimizing indexes and queries.
- Implemented PowerBI Embedded reporting solution.
- Developed APIs and customer-facing features.
- Rewrote checkout experience by updating payment systems and implementing timed checkout, reducing inventory race conditions.
- Collaborated with stakeholders across inventory, shipping, and analytics teams in an agile environment.

2020 - 2022 | Lumiio Inc.

Full Stack Developer

- Led full-stack development for health data applications using Laravel, Livewire, and Alpine.js (TALL stack)
- Mentored a team of junior developers.
- Managed code infrastructure via AWS and Laravel Forge.
- Implemented OWASP security best practices and led internal security training initiatives.
- Trained in web security, server/file management (AWS, Laravel Forge), and UI/UX design.

2017 - 2018 | Shawn Veltman & Associates

Junior Developer

- Developed and maintained Laravel-based CRM and sales tracking systems with TDD practices.
- Collaborated with clients and partners to integrate new features and testing protocols into existing projects, increasing customer satisfaction
